

PONTE VEDRA BEACH RESTORATION

CONTRACT NO.:
IFB 1677

PROJECT DESCRIPTION

This \$36.2M project which consisted of restoration of eroded coastal dune systems, or beach berms, by replacing approximately 2 million cubic yards (CY) of lost sand attributed to Hurricanes Matthew and Irma with beach compatible sand from commercial dredging sources. The project encompassed approximately 8.9 miles within a 41.5-mile stretch along the Atlantic coastline from east of Ponte Vedra Blvd. to Vilano Beach and required daily coordination with sea turtle and shorebird nesting activities.
