Project Description

This is a public/private partnership bulkhead project between the Downtown Investment Authority, the City, and the Developer for the redevelopment of this 32 Acre Brownsfield Development site on the St. Johns River. The project includes the removal of existing flume walls and sheeting, installation of approximately 1,300 LF of epoxy-coated seawall sheeting, and approximately 400 LF of rubble revetment over an underground high voltage JEA subaqueous electrical crossing. The project also includes the construction of a new concrete seawall cap, earthwork backfilling, and minor drainage improvements.
