

Biscayne Boulevard Sidewalk over I-295 Bridge Modifications

Contract No: 0151-22

Client: City of Jacksonville

Start/End Dates: 3/22 - 5/23

County: Duval

Construction Cost: \$1.9M

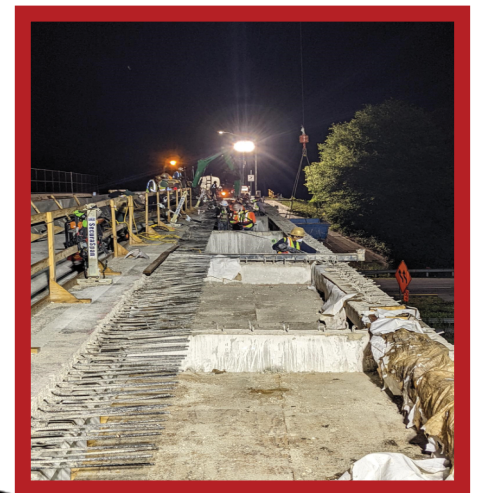

Reference: Jack Gabriel, P.E.

Construction Project Manager

(904) 255-8746

Project Description

This bridge modifications project consisted of the removal of the deck, barrier wall, joints, and reinforcing steel to facilitate the replacement of the barrier wall to accommodate a shared-use path. Existing beams remained in place. This project included demolition over I-295 which required coordinated detours and lane closures with an adjacent FDOT project. Additional scope items included miscellaneous spall repairs and other incidental roadway work such as thermoplastic striping and temporary barrier wall placement. Extended lane closures on Biscayne Blvd. were made possible with temporary signalization
