

PENSACOLA BAY BRIDGE REPLACEMENT

FIN NO.:
409334-1-52-01

PROJECT DESCRIPTION

This \$400M project replaced the Pensacola Bay Bridge, spanning from Escambia to Santa Rosa County. It involved constructing two independent SR 30 (US 98) bridge structures across Pensacola Bay and replacing the existing 3-mile-long bridge. The project also widened US 98 to a 6-lane facility with bike lanes, a 10' shared-use path, and aesthetic street lighting. It included utility adjustments, such as constructing over 2,000 feet of 24" water mains, relocating gas mains and services near Gulf Breeze, and adjusting thousands of feet of fiber optic cables serving Gulf Breeze, Pensacola, Pensacola Beach, and surrounding areas.
