SIPS - DEERWOOD SEGMENTS I, II, AND III

CONTRACT NO.: 184571

PROJECT DESCRIPTION

These three major projects, totaling \$81 million, are part of JEA's ongoing CEI contract to enhance the Southside Integrated Pipe System (SIPS) Water Main (WM).

Segment I (\$21M) spans Forest Blvd. from Bradley Rd. to the JEA Easement, including the installation of 20,759 LF of 30" DIP SIPS WM, 186 LF of 30" DIP via Auger Boring, 3,548 LF of 6" PVC water main, and road reconstruction.

Segment II (\$30M) runs from the JEA Easement to the Deerwood WTP, installing 12,100 LF of 30" DIP SIPS WM, 10 LF of 36" DIP SIPS WM, 880 LF of 36" HDPE SIPS WM via HDD, and other infrastructure.

Segment III (\$30M) connects the SIPS WM to the WTP tank, installing 20 LF of 30" DIP and 300 LF of 24" DIP SIPS WM, along with a WTP Intertie Station, Water Quality Monitoring Station, and SCADA integration.
